210TP Introduction and Features

Congratulations on purchasing the 410TP bass enclosure by Hartke! The Transporter Series enclosures have been designed to provide excellent tone with a fast attack, deep low-end and punchy output. The 210TP Features two 10", proprietary low frequency drivers with specially designed aluminum cones, large voice coils on Kapton formers, impregnated fabric surrounds, and matched convex dust covers all mounted in a heavy-duty steel frame. Using heavy-duty plywood construction, covered in rugged carpet with recessed jack plate and ergonomic handle, the 210TP will provide reliable performance from gig to gig and venue to venue.

In these pages, you'll find a detailed description of the features of the 410TP, as well as a description of its front and rear panels, step-by-step instructions for its setup and use and full specifications. You'll also find a warranty card enclosed—please don't forget to fill it out and mail it in so that you can receive online technical support and so we can send you updated information about these and other Samson products in the future.

We recommend you record your serial number in the space provided below for future reference.

Serial number: _____

Date of purchase: _____

Should your unit ever require servicing, a Return Authorization number (RA) must be obtained before shipping your unit to Samson. Without this number, the unit will not be accepted. Please call Samson at 1-800-3SAMSON (1-800-372-6766) for a Return Authorization number prior to shipping your unit. Please retain the original packing materials and if possible, return the unit in the original carton and packing materials.

410TP Features

- 2 x 10 Inch heavy-duty Low Frequency drivers
- 3/4" Plywood construction
- Tuned Rear Port
- Perforated metal speaker grill
- Recessed handles
- Stacking corners
- Dual, parallel wired 1/4" jacks
- Covered in durable carpet

Connecting the 210TP

About Impedance

Before you hook up your speaker cabinet, be sure that you understand a little about impedance. Impedance is the electronic load that the speaker puts on the power amplifier and is measured in Ohms.

Here is the tricky, yet simple rule of impedance: When two speakers are wired in "Parallel" the total impedance is cut in half and when two speakers are wire is "Series" the total impedance is the sum of the speakers individual impedance.

The 210TP impedance is 8 Ohms. So, when two 210TP's are connected together in parallel, the total impedance is 4 Ohms. The impedance of your speaker also has an effect on your amplifier. In general, the lower the impedance, the more power your amplifier will put out.

IMPORTANT: There is a minimum safe impedance so be sure to check the manufacturer's recommended impedance for your amplifier to avoid any damage to your amplifier or voiding your warranty.

Connecting the 210TP to Your Amplifier

The 210TP connections are made via 1/4" phone jacks located on the rear panel jack-plate. Be sure to make your connection with un-shielded speaker cable. Connect the Amplifier Output to the speaker Input on the 210TP's rear jackplate.

Using the EXTENSION Output

The 210TP provides a convenient Extension Output for connecting additional speaker cabinets in parallel. Be sure to read the section above on impedance to insure a proper hook up with your amplifier. Follow the steps below to connect two 210TP's using the Extension Output. Connect the Amplifier Output to the Input of the first 210TP. Now, connect the Extension Output to the Input of the second 210TP.

Specifications

Hartke 210TP Specifications

Type	Tuned, Tube Port Enclosure
Impedance (Ohms)	8 Ohms Impedance
Power Handling	150 Watts Peak Power Handling
Drivers	2 Hartke 10TP16 Special Design Aluminum 15", 8 ohm, 75 watt drive units
SPL	94dB @ 1W/1M
Frequency Response	50Hz - 4kHz
Inputs	Single 1/4"
Weight	36 lbs. (16.33 kg)
Dimensions	Height: 14" (35.56 cm) Width: 24" (60.96 cm) Depth: 12" (30.48 cm)
