

EXPEDITION XP308i

300-Watt Portable PA

The Expedition XP308i offers a PA solution that combines powerful stereo sound with portability and simplicity. With its clever design, the XP308i packs up into a single unit that weighs just under 40 pounds. Perfect for schools, conferences and presentations, as well as musicians and singer-songwriters, the XP308i is the ultimate in portable sound.

A removable 8-channel mixer powers the XP308i with a 300-watt (2 x 150) Class D amplifier. The mixer features four Mic/Line channels with XLR and 1/4" inputs, allowing you to connect microphones or line signals. It also includes two stereo input channels for connecting external devices like MP3 players, keyboards and more. You can even engage the phantom power switch if you are using condenser microphones. There's also built-in DSP to add Digital Reverb to your voice or instrument. Each channel features 2-band (bass and treble) controls. The XP308i's 2-way vented speakers give you a clean, powerful stereo sound. They produce deep bass tones, as well as pure dispersion and loud, lucid audio, through 8" low frequency drivers and custom 1" tweeters with 60° x 90° coverage. For display flexibility, these ABS, high impact plastic enclosures feature integrated 1 3/8" speaker stand mounts, as well as a kickback design for use as floor monitors.

For enhanced convenience and versatility, the XP308i features an onboard iPod dock that easily connects to most iPod models for seamless music playback. You can also use the iPod dock in combination with the included BT30 30-Pin *Bluetooth*® Receiver to transform the XP308i into a *Bluetooth*-enabled system capable of streaming music wirelessly from smartphones, tablets and laptops.
