

G-TRACK

USB Condenser Mic with Audio Interface

Samson's G-Track is the world's first USB condenser microphone with a built-in audio interface and mixer, allowing simultaneous recording of vocals along with guitars, bass, or keyboard while also providing no latency monitoring through an on-board headphone output. And the G-Track allows you to switch the interface so that you record vocals only or instruments only or a mix of both.

Now singer/songwriters can directly record vocals and instruments quickly and easily with one device, making the G-Track a must have for any songwriter's home studio. And its ease of use and portability allows you to take it anywhere inspiration may strike you.

Ideal for the traveling musician or the project studio, the G-Track includes a heavy-duty mic stand, USB cable and specially developed audio cables to connect any musical instrument with a standard 1/4-inch output to the G-Track. The G-Track ships with Cakewalk® Sonar LE and works brilliantly with Apple's GarageBand.

FEATURES

- Large, 19mm diaphragm studio condenser mic
- USB audio interface with 16-bit, 48kHz resolution
- Plugs directly into any computer with a USB input, no drivers required
- Compatible with most computer-based digital audio workstation software
