

MTR101

Condenser Microphone

PRODUCT INFORMATION

2014

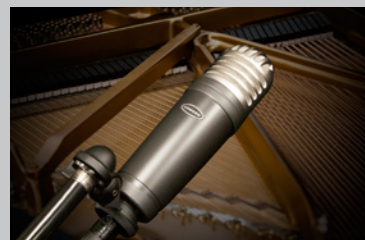

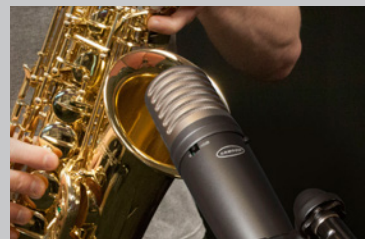

Samson's MTR101 Condenser Microphone brings exceptional performance and high-end quality to a variety of live and studio situations. Ideal for recording vocals, close miking instruments, use as a room microphone and more, the MTR101 solidifies Samson's commitment to offering superior sound and the ability to capture the best audio possible.

The MTR101 is a large, 1-inch diaphragm studio condenser microphone. It features a cardioid pickup pattern that provides increased isolation of a sound source and is designed to handle high SPLs of up to 137dB. The MTR101 produces a smooth, extended frequency response, as well as low self-noise and a wide dynamic range perfect for recording. In addition, its internally shock-mounted capsule also reduces handling noise and external vibrations. This rugged die cast microphone comes with a mic clip designed to fit all standard microphone stands.

Sound superior with the new MTR101 Condenser Microphone from Samson.
