

## POSITIONING

Samson's Z35s are closed-back, over-ear studio headphones that share a clarity and presence found throughout the Z Series. Their natural, flat response stems from Samson's experience in studio monitor design. Ideal for listening to music and field audio, the Z35s feature convenient, collapsible 90° rotating ear cup with high-quality protein leather ear pads for enhanced comfort and portability.

## FEATURES

### Comfort

Sound quality means little if your headphones aren't completely comfortable. Compared to the Z25s, the Z35s come standard with higher-grade protein leather ear pads. An adjustable cushioned headband also adds to a comfortable experience when listening on the go or in the studio.

### Sound

Samson's goal when designing the Z35s was to create a pair of headphones that aren't overly hyped, but play to aspiring audio enthusiasts. The response of the Z35s is noticeably flat and natural, with clarity representative of the entire Z Series line. These headphones don't trade audio quality for cost or convenience.

### Design

Both durable and lightweight, the Z35 headphones sport a sleek, low-profile modern design. As closed-back style headphones, the Z35s provide effective sound isolation by limiting unwanted background noise. For added portability and convenience, the Z35s feature collapsible, 90° rotating ear cups that allow the headphones to sit completely flat when being transported, or be folded up and placed in the included carry pouch.
